## With Its Wide Variety of Roses, Plants, Seeds Presents to You One of the Greatest Catalogues of the Year.

### The Glory of Your Garden

It is a common saying that the love of flowers is universal. Considering that the tendency of the age is to subdivide occupations and interests, it is not surprising that many of us find much leisure time given to the study and cultivation of flowers. The stress of every day life finds much relaxation in the flower garden, which affords varied interest, exercise and profitable pleasure the year round. And we find there much encouragement in the work of one's own hands. Not only does personal work make one's garden seem better and more attractive, but out of it develops a keen interest in comparison and competition. It is a happy thought for all that out of the smallest plot of ground one can raise the finest flowers that can be grown, and a happy thought for us, that we can present to all flower lovers in this and other lands the opportunity to provide for their gardens all kinds of plants at a minimum of expense. That is why we take pride in the presentation of our new Year Book. Through its yearly distribution we have established a clientele of which any concern may well be proud. We take this opportunity of expressing our appreciation of this success which many thousands of customers have brought about through their repeated purchases. Our book comes to you now offering at manufacturers' and growers' prices the stock of the largest plant producing establishment of its kind in the United States, offering something for every garden—everything for some gardens. It is, in brief, a floricultural department store at your door. Extraordinary values fill its pages. Goods are of the highest McGregor quality. Prices are unprecedentedly low. Every offering helps to provide for a more beautiful garden and we believe, therefore, that this catalogue, which we hope you will find pleasing and helpful, is entitled to your fullest consideration.

# McGregor's Monthly Blooming Cut Flower Roses

On this page and pages 7 and 9, we have listed some of the best monthly blooming own root roses that can be produced, and which fit best into the varying conditions in all the states in the Union. They make rose growing easy; they eliminate the troubles that come to some of the less experienced rose growers. Many amateurs have planted cut roses from the best of budded stock and in a couple of years have only brier growth for their efforts. Therefore, for the less experienced, we recommend the own rooted stock.

CHRYSANthemUMS on this page are large flowering cut flower varieties like you see in the cut flower stores. To grow these for large flowers, let the plants grow with only one or two stems, one bud to each stem, and keep the plants well fertilized. All Chrysanthemums are reasonably hardy if planted in a well drained position and given a covering of loose material during the winter. Chrysanthemums are offered this year as reasonable as we have ever offered them, considering quality and our guarantee.
